Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- (currently amended). An ultraviolet curable, water-based coating <u>composition</u> comprising one or more polyurethane dispersions, <u>one or more silicone resin emulsions</u> and one or more photoinitiators.
- (currently amended). The coating <u>composition</u> of claim 1, wherein at least one of the one
 or more photoinitiators comprises an oligometric hydroxy ketone emulsion photoinitiator.
- (currently amended). The coating <u>composition</u> of claim 1, further comprising at least one high UV ultraviolet stabilizer, high UV ultraviolet absorber or mixtures thereof.
- (currently amended). The coating <u>composition</u> of claim 1, further comprising one or more
 of the group consisting of wetting agents, <u>silicon resin emulsions</u>, carbon black, nylon and
 reactive wax.
- (currently amended). The coating <u>composition</u> of claim 1, wherein the <u>weight of the</u>
 coating <u>composition</u> comprises in the range of from about 10 wt % to about 80 wt % of the one or more polyurethane dispersions.
- (currently amended). The coating <u>composition</u> of claim 5, wherein the <u>weight of the</u>
 coating <u>composition</u> comprises in the range of about 30 to about 70 wt % of the one or more polyurethane dispersions.
- 7. (currently amended). The coating <u>composition</u> of claim 1, wherein the <u>weight of the</u> coating <u>composition</u> comprises in the range of from about 0.5 wt % to about 10 wt % of the one or more photoinitiators.
- (currently amended). The coating composition of claim 7, wherein the weight of the
 coating composition comprises in the range of about 0.5 to about 5 wt % of the one or
 more photoinitiators.

- (currently amended). The coating <u>composition</u> of claim 4, wherein the <u>weight of the</u>
 coating <u>composition</u> comprises in the range of from about 2 wt % to about 20 wt % of the silicone resin emulsion.
- (currently amended). The coating <u>composition</u> of claim 9, wherein the <u>weight of the</u>
 coating <u>composition</u> comprises in the range of about 5 to about 15wt % of the silicone resin emulsion.
- 11. (currently amended). The coating <u>composition</u> of claim 4, wherein the <u>weight of the</u>

 coating <u>composition</u> comprises in the range of from about 1 wt % to about 15 wt % of the

 <u>reactive</u> wax.
- 12. (currently amended). The coating <u>composition</u> of claim 11 wherein the <u>weight of the</u> coating <u>composition</u> comprises in the range of about 2 to about 10 wt % of the <u>reactive</u> wax.
- 13. (currently amended). The coating <u>composition</u> of claim 4, wherein the <u>weight of the</u> coating <u>composition</u> comprises in the range of from about 2 wt % to about 15 wt % of the nylon.
- 14. (currently amended). The coating <u>composition</u> of claim 13, wherein the <u>weight of the</u> coating composition comprises in the range of about 2 to about 10 wt % of the nylon.
- 15. (currently amended). The coating <u>composition</u> of claim 4 wherein the silicone resin emulsion is a high molecular weight silicone resin emulsion.
- 16. (currently amended). The coating <u>composition</u> of claim 15 wherein the high molecular weight silicone resin emulsion has a molecular weight in the range from about 1000 to about 700,000.
- (currently amended). The coating <u>composition</u> of claim 15 wherein the high molecular weight silicone resin is polydimethoxysiloxane.
- 18. (currently amended). The coating <u>composition</u> of claim 1, wherein the one or more polyurethane dispersions have a minimal film formation temperature in the range of about 0°C to about 25°C.

- 19. (currently amended). The coating <u>composition</u> of claim 1, wherein the one or more polyurethane dispersions have an elongation greater than about 300%.
- 20. (currently amended). The coating <u>composition</u> of claim 1, wherein the one or more polyurethane dispersions have a Konig Hardness in the range of about 25 seconds to about 100 seconds.
- 21. (currently amended). An article coated with the coating <u>composition</u> of claim 1 <u>and cured</u> with ultraviolet light to form a coated article.
- (original). The article of claim 21, wherein the article comprises a weatherstrip,
 windshield wiper or automotive seal.
- 23. (original). An appearance coating for an outer belt comprising the coating of claim 1.
